PROFESSIONAL SUMMARY

Full Stack Developer with production ownership across wedding marketplaces, CRM systems, and event platforms. Strongest on **PHP/Laravel**, **Node.js/Express**, and **Angular**, with hands-on Firebase (Auth, Firestore, Cloud Functions, Hosting) and MySQL/MongoDB. Ships end-to-end features: REST APIs, auth/RBAC, bilingual Arabic/English UIs, queue/webhook workflows, Dockerized Laravel services, and production debugging on Linux/VPS. Comfortable modernizing legacy PHP codebases and integrating third-party email/SMS providers. B.Sc. Information Technology (EELU) + ITI Open Source Application Development diploma.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, SQL, Dart, C#

Backend: Laravel (APIs, queues, Filament/Livewire), Node.js, Express, ASP.NET Core, REST, OOP, Clean Architecture

Frontend: Angular 16, Flutter Web, HTML5, CSS3/Tailwind, Responsive UI, bilingual AR/EN & RTL

Databases: MySQL, MongoDB, Firebase Firestore, PostgreSQL (familiar), query optimization, migrations/schema design

Cloud & DevOps: Linux, Apache, Git, Docker / Docker Compose, Firebase (Auth, Functions, Hosting, Storage), PM2, VPS deploys

Auth & Security: JWT, RBAC, Firebase Auth (email/Google/Facebook), OWASP basics

Integrations: REST APIs, Webhooks, SendGrid, Twilio, Mailgun, Postmark, PHPMailer, WordPress

Practices: PHPUnit, idempotent processing, cron/jobs, production debugging, MVVM

PROFESSIONAL EXPERIENCE

FarahyEGY — Wedding Marketplace

08/2025 – Present · Cairo

Full Stack Developer · Angular 16 · Firebase · TypeScript

- Owned production features across the public marketplace, admin dashboard, and supplier portal (Angular 16 + Tailwind), including landing/about content, ads placements, dialogs, and media upload flows.
- Built and maintained serverless backend logic with Firebase Cloud Functions (TypeScript); modeled product data on Cloud Firestore and Firebase Storage.
- Implemented Firebase Auth with Google/Facebook social login and fixed account-linking edge cases so the same identity cannot create duplicate users.
- Delivered bilingual Arabic/English UI work with correct RTL behavior for a MENA wedding marketplace audience.
- Integrated SendGrid and Twilio for automated email/SMS; shipped via Firebase Hosting deploy targets (dev/prod) and production debugging.
- Operated Firebase backups/safety workflows before intern access to supplier accounts; handled production issues (uploads, auth, content sourced from DB vs static).

Farahy CRM

08/2025 – Present · Cairo

Full Stack Developer · Flutter Web · Node.js/Express · MongoDB · Firebase

- Built and maintained an internal CRM for clients, events, suppliers, employees, and financial tracking (Flutter Web frontend + Node.js/Express API + MongoDB/Firebase Admin).
- Implemented Firebase Auth with RBAC: roles, per-user permission overrides, and a Users & Permissions admin panel.
- Designed supplier-account and event-budget workflows (Estimate Budget, commissions, Final \$, To Be Paid, remaining balances).
- Developed automated email flows (Nodemailer) for assignments, reminders, invites, verification codes, and password reset.
- Deployed to production (Firebase Hosting + Linux VPS/PM2) with versioned frontend releases.

WeddingsOnline UAE

08/2025 – Present · UAE (Remote)

Full Stack Developer · PHP · MySQL · Smarty · WordPress

- Maintain and extend production marketplace **weddingsonline.ae** (public site, admin CMS, Supplier HQ, sales CRM) on PHP/MySQL/Smarty with a custom OOP architecture.
- Built a unified Service/Venue Finder (region, category, budget, capacity) with a queued email lead pipeline (Postmark/Mailgun), cron delivery, suppression, and retries.
- Redesigned WordPress blog + supplier-facing pages; shipped a WebP image pipeline to reduce asset weight.
- Modernized legacy PHP 7.4 code (`mysql_*` → `mysqli`, PHPExcel/PHPMailer compatibility) and shipped production hotfixes for lead delivery and Supplier HQ auth/URLs.

Dubai Wedding Summit

08/2025 – Present · UAE (Remote)

Laravel Developer · Laravel · Filament/Livewire · MySQL

- Developed and maintained a Laravel event-registration platform with Filament admin and Livewire-driven UI.
- Designed and operated MySQL schemas/migrations for registrations and related event data; set up local environments against production SQL dumps safely.
- Built secure REST/API-style endpoints and admin workflows used by organizers for summit operations.

WeddingsOnline Mauritius

08/2025 – Present · Mauritius (Remote)

Full Stack Developer · PHP · MySQL · Tailwind

- Developed scalable PHP web applications and 15+ REST APIs with MySQL query optimization (~40% faster responses on critical paths).
- Built responsive UI surfaces with Tailwind CSS for supplier/couple-facing flows.

Galeloo (Freelance)

11/2025 – 05/2026 · Remote

Full Stack Developer · PHP · Node.js · Socket.io

- Built backend systems in PHP and Node.js with real-time features via Socket.io.
- Designed relational schemas aligned with business workflows.

Masar University

12/2025 – 03/2026 · UAE (Remote)

Full Stack Developer · LMS / SIS

- Developed LMS and SIS modules serving 2,000+ students; designed 20+ REST APIs with JWT authentication.
- Optimized MySQL queries (~35% faster) and implemented RBAC across 5+ user roles.

A&Z Lounge POS

06/2026 · Asyut

.NET Developer · C# · .NET 8 · WPF · ASP.NET Core

- Built a role-based restaurant/lounge POS with clean architecture, ESC/POS printing, shift reconciliation, and sales reporting.

SELECTED PROJECTS

Warehouse Inventory Reservation Engine

07/2026 · Laravel · MySQL · Docker

- Concurrent inventory engine with row-level locking (SELECT ... FOR UPDATE) to prevent overselling under race conditions.
- Idempotent reservation/shipment processing and carrier webhooks (unique event keys, retries/backoff via Laravel queues).
- Stock buckets (available/reserved/picked/packed) with an append-only movement ledger; Docker Compose + PHPUnit coverage for critical failure scenarios.
- GitHub: github.com/MohamedAliAmean/inventory_reservation

Employee Attendance Desktop App

08/2026

- Designed a shared-device attendance system (check-in/check-out with timestamp precision) plus an admin panel for employee and attendance management.

Restaurant POS System

06/2026 · C# · .NET 8 · WPF · ASP.NET Core

- Role-based POS for restaurant/cafe/lounge: order workflow, shifts, split payments, sales reporting (EF Core), ESC/POS multi-station printing.

Employee Management System

05/2025 · Laravel · Angular · MySQL

- Auth/RBAC, normalized MySQL schema, REST APIs for job posting and CV management.

Exam System

04/2025 · Node.js · Express

- Role-based examination platform with REST APIs and Chart.js performance analytics.

EDUCATION

ITI — Open Source Application Development Diploma (9 months)

10/2024 – 06/2025 · Egypt

Egyptian E-Learning University (EELU) — B.Sc. Information Technology

10/2019 – 07/2023 · Egypt · GPA 2.93/4

Graduation project: Bad Food Detection Using AI — image classification / computer vision.

LANGUAGES & SOFT SKILLS

Languages: Arabic (Native) · English (Fluent)

Soft skills: Production ownership · Independent delivery · Technical communication · Problem solving · Cross-functional collaboration
